

Product Description:

This metal hinge is made of zinc-plated steel, providing excellent resistance to rust and corrosion. It features a bright appearance and sturdy construction, ideal for use in industrial equipment, electrical cabinets, toolboxes, and vehicle compartments that require reliable opening and closing.

Features:

1. High Strength Structure: Made from cold-rolled steel with stamped construction for durability and strength.
2. Zinc Plated Surface: Zinc plating provides effective corrosion protection and extends service life.
3. Easy Installation: Equipped with standard mounting holes for convenient installation.
4. Smooth Operation: Precisely machined hinge pin ensures smooth and stable movement.
5. Versatile Application: Suitable for doors, enclosures, cabinets, and industrial equipment.

Technical Data:

Product: Metal Hinge

Material: Zinc Plated Steel

Model: CL127-1

Weight: 200g.

Color: Silver

Mounting Holes: 4 mounting holes (2 on each side)

Application: Industrial locks, cabinet doors, electrical boxes, and equipment panels

Surface Finish: Zinc Plated

Manufacture: Zhejiang Baotai Cabinet Lock Co., Ltd.
